

Sheet Cleaners for Corrugated Flexo Printers

- Aggressively lifts dust and particles from the corrugated surface
- Reduces lost production time due to plate wash-up stops
- Improves color consistency throughout the production run
- Reduces hickeys and print defects especially in heavy solids areas.

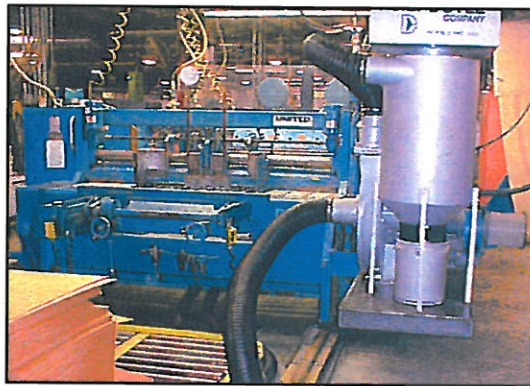

Sheet Cleaner is located after the infeed rollers, before first print station, to clean the printed side of sheet

Doyle Systems uses high velocity Air Scrubbing, Dual Brushing and Powerful, High-Pressure Vacuum

Cyclone dust collector mounted on press, provides low maintenance, high flow, clean dust containment

Doyle Systems sheet cleaners are designed to fit most major manufacturers of flexo rotary die cutters and folders from 60" to 148"
